Professional Summary

I am a TOGAF Certified Architect specializing in Google Cloud and AWS, known for my understanding of cloud solutions and advanced software development technologies. With over 12 years of immersive IT experience and a dedication to staying ahead in the field, I am eager to apply my expertise as a trainer.

Highlights of Qualification

- Adept at delivering impactful training as a seasoned freelancer, leveraging a wealth of hands-on experience to create immersive learning journeys.
- Possess exceptional written and oral communication prowess, seamlessly translating complex concepts into accessible insights that resonate with learners.
- Thrive in self-driven environments, seamlessly orchestrating training sessions that captivate audiences through compelling content and engaging delivery.
- Skillfully identify training needs, crafting sessions that not only capture attention but also facilitate lasting comprehension, ensuring participants retain critical information.
- Demonstrate prowess in curating comprehensive study materials and crafting training programs that seamlessly guide learners toward mastery, culminating in impactful knowledge transfer.
- With a portfolio of 1000+ articles spanning diverse technologies, adeptly bring intricate subjects to life through articulate technical writing that resonates with audiences.
- Leverage strong collaboration skills, adeptly interfacing with teams to glean insights and craft training experiences that resonate deeply with participants.

Professional Work Experience

in28minutes, Remote

Oct. 2023 — Present

Gen AI, Spring-boot, and DevOps/Cloud technologies consultant (Part-time Contractor)

- Helping the team prepare the technical content on the Gen AI, Spring Boot, and DevOps (CI/CD) plus cloud courses (i.e. AWS, Azure, GCP) for Udemy.
- Designed and prepared customized study materials and teaching strategies tailored to both IT and non-IT students, effectively catering to diverse learning styles and backgrounds.
- Organized and facilitated hands-on lab exercises, allowing participants to apply theoretical concepts in practical scenarios and reinforcing their understanding of the subject matter.
- Participating in industry conferences on Gen AI and Cloud.
- Working as an Administrator and Moderator for the in28minutes Discord community.

Java Code Geeks, Remote

Apr. 2018 — Present

Full-time Technical Content Writer

- Experienced Technical Content Writer with 5+ years of proven expertise in creating clear, concise, and engaging technical documentation.
- Proficient in crafting high-quality technical documentation, including user manuals, API guides, whitepapers, and knowledge-base articles.
- Extensive experience in using various documentation tools and platforms.

- Strong understanding of writing for different target audiences, from beginners to advanced users, tailoring content to their needs.
- Demonstrated ability to grasp intricate technical concepts quickly and present them in a simplified manner.
- Proficient in a wide range of technologies including Java, Spring, Spring boot, Hibernate, Angular, React, NodeJs, Express, NoSql, SQL, Cloud related technologies.
- Collaborate effectively with cross-functional teams including engineers, product managers, and designers to ensure the accuracy and completeness of content.
- Authored engaging blog posts, tutorials, and case studies to establish thought leadership and drive organic traffic.
- Implemented quality assurance processes that led to error-free documentation and improved overall document quality.
- Provided training and mentorship to junior writers, imparting best practices and fostering skill development within the team.
- Organized workshops and presentations to educate the broader organization about the importance of clear and effective technical documentation.

Stello AI, Remote

Jan. 2025 — Apr. 2025

Freelance Generative AI Developer

- Designed and developed a Compensation Planning Agent using AWS, AWS Lambda, LangChain, OpenAI, and Pandas.
- Built scalable serverless systems leveraging AWS Lambda to ensure efficient, low-latency processing.
- Engineered LangChain-powered language models to interpret and generate context-aware responses tailored to compensation scenarios.
- Utilized Pandas for data cleaning and preprocessing to ensure high-quality, structured inputs for AI models.
- Integrated OpenAI's GPT-based models to enhance the agent's reasoning, adaptability, and recommendation accuracy.
- Collaborated closely with cross-functional teams to align the solution with business goals and ensure user-friendly outcomes.
- Successfully automated key aspects of compensation planning, enabling dynamic, data-driven decision-making at scale.

Ducat Education, Gurugram

Oct. 2020 — Jul. 2023

Freelance Spring-boot and DevOps/Cloud technologies Technical trainer

- Conducted engaging offline and online training sessions on DevOps (CI/CD), AWS, and Azure for diverse groups of 10-20+ students, fostering an environment of collaborative learning and knowledge sharing.
- Leveraged creative presentation techniques, including multimedia and humor, to capture participants' attention and enhance the learning experience, resulting in improved information retention.
- Collaborated with Ducat and NASSCOM to conceptualize, design, and develop comprehensive training programs, curricula, and instructional manuals for AWS and Azure cloud technologies, contributing to the upskilling of professionals and students.
- Demonstrated dedication by addressing technical queries from students enthusiastically, fostering a supportive learning atmosphere, and encouraging open dialogue.
- Designed and prepared customized study materials and teaching strategies tailored to both IT and non-IT students, effectively catering to diverse learning styles and backgrounds.
- Conducted mock interviews to simulate real-world scenarios, equipping students with the skills and confidence needed to excel in cloud technology interviews.
- Monitored and meticulously tracked the training progress of students, providing insightful reports to the management, which contributed to the program's ongoing refinement and success.
- Collaborated with placement teams to achieve commendable placement records for freshers and individuals with professional gaps, facilitating successful transitions into the industry.
- Utilized feedback from participants and stakeholders to continuously improve training content, delivery methods, and overall training effectiveness.
- Organized and facilitated hands-on lab exercises, allowing participants to apply theoretical concepts in practical

scenarios and reinforcing their understanding of the subject matter.

- Participated in industry conferences and workshops to network with peers, share insights, and stay informed about emerging trends in cloud technologies and education methodologies.
- Actively stayed updated with the latest trends and advancements in DevOps, cloud technologies, and related fields to ensure the training materials remained relevant and aligned with industry standards.

Key Skills

- **Generative AI Development:** Hands-on experience building AI-powered agents using LangChain, OpenAI, AWS Lambda, and Pandas. Successfully developed a Compensation Planning Agent at StelloAI, automating business logic through serverless infrastructure and intelligent language models.
- **Curriculum Design Expertise:** Proven ability to design and deliver technical curricula that seamlessly bridge theoretical foundations with practical applications, enabling learners to grasp and apply complex concepts effectively.
- **Versatile Technical Trainer:** Extensive training experience across a broad spectrum of technologies, including Java 8, Spring Framework, Spring Boot, Spring Security, Hibernate, Angular, React, AWS, Azure, GCP, and DevOps (CI/CD) with Python.
- **Inclusive Teaching Style:** Skilled at adapting teaching methods to suit both IT and non-IT audiences, creating tailored, inclusive, and engaging learning experiences for diverse learner groups.
- **Responsive Learner Support:** Competent in managing support queries via phone and email, delivering accurate and timely assistance to ensure learner success and satisfaction.
- **Problem Solving & Troubleshooting:** Strong analytical and troubleshooting capabilities, ensuring a smooth learning journey by proactively identifying and resolving issues.

Certifications

- TOGAF Certification in June 2024
- Google Cloud Architect Certified in May 2024
- AWS Certified Solution Architect Associate in Feb. 2020 (Expired)
- Scrum Certified Product Owner in Oct. 2019 (Expired)
